Notice: Public Notice.

Temperance Trefethen,

Abraham Trefethen's widow, Hereby calls upon all persons, who may have any accounts against her, to present them to her attorney, Mr. GEORGE RICHARDS, for settlement—and all persons who are any ways indebted—are requested, to make payment to the abovesaid attorney, as soon as possible.

Temperance Trefethen. June 12, 1864.

The subscriber will attend to the concerns of Mrs. Temperance Trefethen, every Thursday afternoon, from 3 o'clock to 6 P. M. at his dwelling house, next the Hay-Market, Portsmouth. George Richards. June 12, 1864.

EIGHT THOUSAND DOLLARS,

is a great reward for the life of 5 dollars & 70 cents, and would not run the risk of losing one hundred dollars, to be in a probability of obtaining such a round sum. It would be perfectly well up in business; it would help him after he is set up and with prudence, the interest would support him handsomely, all the days of his appointed time here on earth—and, the principal, he's handsome legacy to bequeath to some beloved friend or should come along him.

Well, here is a chance of obtaining this capital sum, besides several others of less value, which might be made equally beneficial as far as their interest. The Lottery will positively commence drawing the 19th day of this month, without fail, and here is held out to advertisement, one prize of 2000, one of 1000, two of 500, besides many other valuable high prizes, which would make Fortune's Favourite smile at receiving. Please to apply, for TICKETS and Quotations in the above Lottery, at CHARLES PEIRCE'S Brick Bookstore, Daniel Street, Portsmouth, by whom, prizes will be paid immediately after the drawing. In the last class of the S. E. Canal Lottery, there were a number of gentlemen who had all the unexpired tickets in the Lottery, began drawing, to speculate on, and before the drawing was completed, they kept jiffing until they finally were sold for Twenty Four Dollars each! And as a company have it in contemplation to buy up those for a like purpose, CHARLES PEIRCE now gives this correct information, that every person who wishes to put themselves in fortune's way, may do it at the very low price of tickets and quarters are now sold for, by field PEIRCE. July 4.

Thermometers for sale as above.

INDIA COTTONS. B. BRIERLEY, Has just received a large assortment of India Cottons, some of which are of a very superior quality.

FOR SALE BY STEPHEN LITTLE, to chests Hyson and young hyson TEAS, 500 lbs Spanish Float Indigo, 50 Boxes No. 2 Chocolate, 1000 pieces yellow Naikins, 100 pieces Bandannoes, 200 boxes bar Soap, 1 Ton ground Ginger, WANTED, 6 Tons Tallow, for which cash will be paid on delivery.

Agricultural, From the Papers in Agriculture, Published by the Massachusetts Agricultural Society.

ON CURING HAY WITH SALT.

A letter from Samuel W. Peirce, Esq., to the Rev. Dr. Peirce, regarding the mode of curing hay for promoting agriculture in Massachusetts. Cambridge, 15th May, 1864.

AGREEDLY to your request, I have the pleasure to relate the following experiments on clover cured with salt, about the middle of July, 1862. The produce of less than an acre of clover, supposed to be 20 tons when dry, was cut between 9 and 12 o'clock, and immediately spread; it covered the ground very thick; by 5 o'clock it was made up into cocks, and the next day, without opening, was carried to the barn, put upon a scaffold, and mowed into a firm nearly square. It was spread upon the mow; two barrels of refuse salt from the provision barrels was thrown upon it as equally as possible; it was very green, and my foreman observed, that it would in a short time be thrown into the yard for manure.

The winter following, this hay came out perfectly sweet, of a good colour, and was eaten freely by horses and oxen; even the stalks, which were large, were not left.

The beginning of last July, a field of six acres of clover, supposed to be dry to produce ten tons, was cut from 8 to 10 o'clock, and a ton spread. Before 5 o'clock the whole was made up into small cocks, some of which had not been cut two hours. The next day none of it was opened, the carts were in the field by 9 o'clock, and before sunset the whole, which was 15 heavy loads, was carried to the barn, put into a bay and formed a mow 14 feet high. On each layer of clover, of about one-fourth of a load, was strewed coarse Liverpool salt, in the proportion of 3 pecks to a ton; this clover was drier when cut than that mentioned in the first experiment; though half of it was not in bloom, and few heads had turned brown; but owing to the drought it began to waste. The evening it was carted considerable heat was observed by thrusting the hand as far as one could reach into the mow; the next morning, however, no heat was perceived, nor was there afterwards, the real

appearance of fermentation. A few days after, 3 tons more, managed in the same way, was added to the mow, which was supposed to contain 33 tons of dry hay. The whole of this hay came out very dry and sweet; some of it has been sold at a higher price in proportion to other hay at the same time; than clover cured in the common way generally bears. My horses have been kept upon it for these 3 months past, and I never had them look so well with so little grain; they appear more plump of it than of other hay, and there is less left in the manger.

It may be proper to remark, that the weather when the clover was cut and carried, was very fine; and that the cocks upon the mow had been turned bottom upwards half an hour before they were put upon the cart. How this method will answer in cloudy weather, or when the clover has been wet, must be determined by other experiments.

A letter from Mr. Asa Packard, Marlborough, Dec. 5, 1863.

HONORED AND DEAR SIR, Yours of 2d inst. was duly received, by post. In compliance with your request, I have consulted several of the most observing farmers in this vicinity; relative to the best process of curing clover. You refer particularly, in your inquiries, to the method adopted by Captain George Williams; on which you have a partial recollection of conversing with him several years ago. His plan embraces the opinions and the prevailing practice of his most judicious neighbors; I have this day spent an hour with him, on the subject; and though he differs considerably from Dr. Dean, the experience of some years past justifies him in preferring his own method. He places the entire process thus:

With all my labourers I enter the largest and most luxuriant growth of clover as soon as the dew is off; the fork follows the scythe as soon as possible. All that is mowed that day lies spread by 12 o'clock. About one, before half past one, it is turned with a fork. Towards night, say at 6 o'clock it is thrown into small heaps, without a rake. Next morning, as soon as the ground is dry, these heaps are opened, not spread so as to cover the ground, but rather separated in moderate fork loads. These are turned between 11 and 12 o'clock; and at one the cart should receive it, hot and heavy as it is. If dried more it will crumble, lose its leaves, its heads and its nutritive qualities.

When perfectly ready for the team, juice may be squeezed by the fingers from a single straw. From a wisp of it, the size of your hay rake, a man may wring moisture, possibly a drop. Having thrown three or four hundred, about equally, over a ten feet stack, it drew as many quarts of salt; then spread another stratum of hay and a similar quantity of salt, till you have thrown half a bushel on a ton. The top will be now nont.

Of his ordinary process, he gave me the following illustration in a simple statement of facts.

Last year I cut a small piece of heavy clover. My men were belated and a part of it was standing at 12 o'clock. I managed it on that day as if it had been cut in season. The next was tolerable good hay weather, not the best. Observing good signs of rain, I put down one load (about half the piece) of my scaffold at one o'clock. It appeared rather two green. On the succeeding morning it was covered with the Ruffid at one o'clock. It appeared rather too green. On the succeeding morning it was covered on the scaffold with a large dew. The weather on the third day was remarkably drying, and though the load left in the field was moved as early as convenient, it crumbled when it was dried too much. Being placed upon the first load. Both did well, but the bottom of the scaffold was preferable to the more salubrious of the two.

Thus, Sir, I have realized the pleasure of assisting you, particularly, in the most approved process of curing clover, known in this vicinity.

The Massachusetts Agricultural Society have offered the following premium:

To the person who shall, by actual experiment on a quantity of not less than half a ton, show the best method of curing clover hay with salt; regard to the quality of the hay and the saving of labour, and the shortness of time between cutting and packing it in the mow, the silver medal, or 40 dollars; and, to the person who shall show the next best method, 20 dollars. Samples of the hay to be exhibited three months after it is cured to a majority of the selectmen or to the settled minister and justice of the peace in the vicinity. Claims to be made on or before the last Friday of November, 1864.

As it is presumed a considerable proportion of the citizens are unacquainted with the plan of an Exchange Office...

PROSPECTUS OF THE Boston Exchange Office.

This subject being new, and now before our honorable General Court, the subsequent outline is presented...

- 1st.—A fund of 150,000 dollars in current bank bills of this Commonwealth, and a further sum, in specie, not exceeding 50,000, as a guarantee to the people for the safety of a deposit.
2d.—The new bills or notes of credit to be emitted.
3d.—Said fund, and such a proportion of deposits as may be consistent with the safety of the institution...

COMMENTS.

A direct specie capital is not necessary to the operation of this system, as the respective banks will alone be accountable for the payment of their own bills...

This town being the centre of circulation, for all bills of this Commonwealth, the following advantages would result from its operation.

- 1st. It would afford a place of safety from the ravages of fire, thieves, and other casualties.
2d. It would call into active and profitable use, the portion of bank bills occasionally dormant in every man's pocket.
3d. It would furnish the trading interest of the town with the means of punctually discharging their obligations...

6th. The nominal value of out of town bills being established here, it would invite the commerce of sister states, who would the more readily receive, and give currency to bills issued remote from this metropolis...

Note.—The foregoing remarks, if duly considered, will, it is conceived, clearly elucidate this subject. All being granted, that the class of citizens who are the petitioners for this institution, are numerous, useful, enterprising, and industrious...

IMPROVEMENT IN GEOGRAPHY.

Mr. Churchman, author of the Magnetic Charts, has proposed an improvement in the construction of Maps, by which the altitude, declivity, and perpendicular height of the hills and mountains throughout any country, or any particular district, can be indicated.

Cent, should have been performed at the public expense, and published under the direction of the board of ordinance, and other maps now executing in a similar manner.

Union, No. 2.

For the STAR.

WHILE the destined fate of kingdoms and states, founded on stems of oppression, rapidly assumes their final catastrophe, and the nations of Europe, under intolerable bondage, are essaying to disburthen themselves of their repelling loads, and break asunder their galling fetters...

A price is put into our hands, happy will it be for us, if we have hearts to improve it. Upon our own minds, a great dependency the success of the steps which have been taken, and the condition of mankind. Our example will have a propitious tendency to the reform of the old world, and to bring to an end the dreadful calamities of war and while it continues to rage in the nations, the oppressor and delinquent will here find a scourge...

Foreign Intelligence.

On the 10th of May the Seals of office as Prime minister were delivered to the King by Mr. Addington, and immediately presented to Mr. Pitt. Mr. Pitt, at several interviews with His Majesty, had earnestly urged for the admission of Mr. Fox into the Ministry...

The fleet at Spithead is kept in momentary readiness to put to sea. It was reported some overtures for peace were made thro' the American minister at Paris, but not credited.

It is said the French residents are inflexed by the people of Petersburg whenever they appear abroad.

The Paris Monitor of May 9, says the French will invade England when convenient for themselves, and it is deferred for years their success will be more certain.

Napoleon I.

Intelligence is reported to have been received by Buonaparte...

ceived by a foreign Ambassador, that Buonaparte has been proclaimed Emperor of the GAULS, in all the streets and public squares of Paris. All idea of consulting the people is laid aside, the Senatus Consultus of the Conservative Senate, and the decree of the tribunate, are considered sufficient authority to change the French Republic into a MONARCHY...

Political Star.

PORTSMOUTH, THURSDAY, JULY 12.

Persons holding subscription papers to the Political Star are requested to return them, or to retain them and render the names of those who have subscribed, immediately.

Subscribers to the STAR, who do not receive their paper, will be obliged to call at the office and leave word which they require, as some difficulty, at times, occurs in not knowing their residence.

The extracts from the Oracle and G. zette, being somewhat lengthy have been reduced to the necessity of supplying foreign and domestic matters. However we still, that under our foreign head the most material and interesting occurrences will be found, that had transpired at the time the last intelligence left the continent of Europe.

Whether a change in the British Ministry, or the nomination of Buonaparte as Emperor of FRANCE will be followed by any particular event, time will develop; but we are inclined to believe that a general war will precede the restoration of peace. It is hardly probable that the European powers will suffer either of the contending parties, total and it is more than probable that they will see the necessity of settling limits to the arrogance of the one, no less than the presumption of the other.

Hortensius and Philadelphus will appear in our next; we do not present our instance therein this day.

When we promised better paper to our subscribers, we were in hopes that we might depend on the repeated assurances of a paper maker, no many miles distant from this town, who engaged to supply us, and to have a sufficient quantity ready as much as a fortnight previous to our issuing the Star; but these promises still remaining unfulfilled, we have applied elsewhere, and shall be enabled shortly to remedy this evil. We therefore would request Capt. H. that we shall no longer depend on his supplying us.

LATEST ARRIVAL.

Yesterday in the afternoon arrived in this port the brig Betsy, Capt. John McKay of Salem, in 27 days from Dieppe. The files of French papers which he brought contain nothing in addition to what we had before received—the latest of them were dated 9th May. Capt. McKay represents the expedition as in a great state of forwardness, and states the number of troops to be employed at 300,000. He farther adds, that no doubt was entertained in France but what Buonaparte would be crowned, EMPEROR of the GAULS.

American Independence!

From the Oracle. The twenty eighth Anniversary of American Independence was this day celebrated. This day, the most memorable in our annals, was devoted to grateful festivity. The morning was gladdened with the ringing of cannon and ringing of bells, which were repeated at the middle and close of the day. Governor Gilman's Bells, commanded by General Smith, paraded at half past four in a masterly display of military tactics in marching, exercising and firing.

fore ample testimony that the pure spirit of Liberty, is now no less fervent than it was at the first of July, when our patriot fathers broke the chains of tyrannical oppression and rose to liberate a people...

- 1. The Day we celebrate a day which will ever be remembered by the Sons of Columbia with every expression of joy till the names of Liberty and Independence shall center to rebound on our shores.
2. The United States are united; may reason and justice prevail over folly and vice, and may they remain free unfettered against the violence of tempests, and the ambitious views of false patriots.
3. The President of the United States, George Washington, though he dearest be cherished, and his symptoms alarming, yet there is hope from the nature and strength of his constitution and the ability of his physicians.

His Excellency John Taylor Gilman, Esq., his talents, his virtues, and his patriotism, will continue to be cherished for the good of his country, and without any of the imputations of Grand Complot.

- 6. The Federal Constitution is a beautiful, and in every respect, a noble monument of the wisdom and justice of our fathers, and it would become a dreadful monument of their vice and folly.
7. The memory of the GREAT WASHINGTON, the glory of our country, even his name be mentioned without the demonstration of heartfelt gratitude.
8. The Heroes and States of the Revolution, meritorious associates of Washington.

Washington's march to the support of Commerce, may be compared to the support of the United States, may be compared to the support of the United States, may be compared to the support of the United States...

- 9. Agriculture, the support of Commerce, may be compared to the support of the United States, may be compared to the support of the United States, may be compared to the support of the United States...
10. Commerce, the life of Agriculture, and the support of the Navy, can be compared to the support of the United States, may be compared to the support of the United States, may be compared to the support of the United States...
11. The Navy, Protector of Commerce, and guardian of our Liberties, may be compared to the support of the United States, may be compared to the support of the United States, may be compared to the support of the United States...
12. Massachusetts, the Cradle of Liberty, may be compared to the support of the United States, may be compared to the support of the United States, may be compared to the support of the United States...
13. The late President, George Washington, may be compared to the support of the United States, may be compared to the support of the United States, may be compared to the support of the United States...
14. The Judiciary of the United States, may be compared to the support of the United States, may be compared to the support of the United States, may be compared to the support of the United States...

15. All honor be paid to our brave soldiers, who have so bravely defended our liberties, and who have so bravely defended our liberties, and who have so bravely defended our liberties...

VOLUNTEERS.

By Col. Zane. My true patriotism succeeds all selfish motives, and shall beget me to follow for Liberty. By Nathaniel Adams, Esq. True Republicanism—may every Freeman be well informed, and act independently. By Jeremiah Libby, Esq. As individuals discover their wisdom in resisting tyrants and capitalists, so they will be enabled to perform the duty of a citizen, when giving his suffrage for public office, and neither from fear, nor favor ever give a vote for an oppressive candidate.

By Mr. Garland. The price of the day, J. M. Sewall, the legitimate offspring of Homer and Milton. By Mr. Eld. My own members of Congress be the representatives only of their constituents.

SONG.

For the Celebration of Independence, July 4, 1804. Hail the day when from the yoke of tyrannical empire, we broke the chains of bondage, and rose to liberate a people...
